CHAMELEON ANTENNA

CHA ENCLO

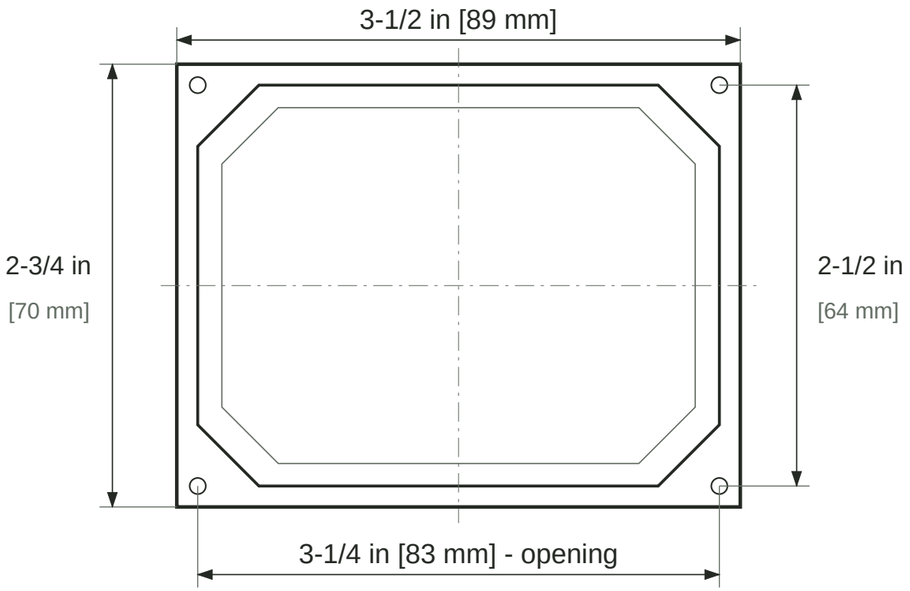

ENCLOSURE + EXTENDED LID / WINDER

CUSTOMER DIMENSIONAL REFERENCE

NOMINAL DIMENSIONS / CUSTOMER REFERENCE

01 BODY - OPEN FACE

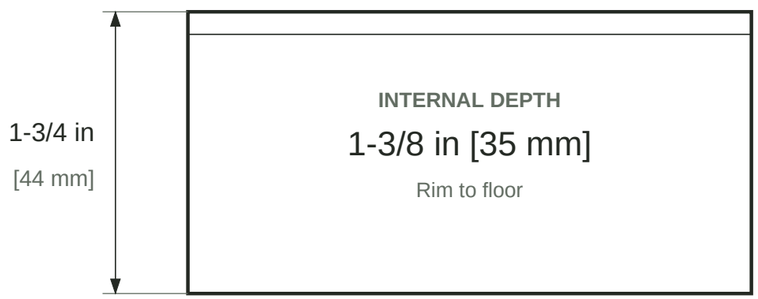

Opening faces viewer; corner and hole details are illustrative.

Cavity narrows at corners and toward the floor.

02 BODY - SIDE ELEVATION

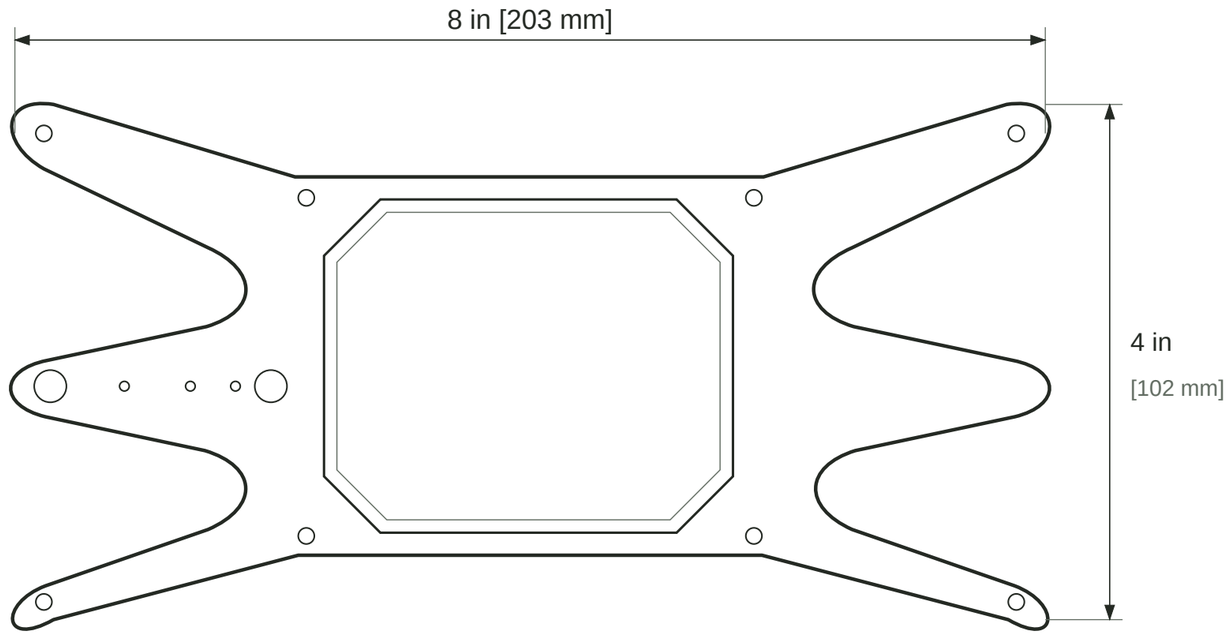

Body only; extended lid and installed hardware excluded.

No assembled-height or hardware-projection dimension implied.

03 EXTENDED LID / WINDER - UNDERSIDE

Cord omitted for clarity; schematic outline follows supplied photographs.

FIT & DIMENSION NOTES

1. Nominal dimensions for customer fit planning; tolerances are unspecified. Bracketed millimeters are rounded conversions, not separate measurements.
2. Internal length and width refer to the opening, not a guaranteed rectangular working volume. Corner chamfers, wall draft and fittings reduce clearance.
3. FT240-size builds are intentionally snug. Trial-fit the completed winding; preserve insulation clearance and close the lid without forcing it.
4. Hole diameters, center distances, radii and wall thickness are not established by these photos. No drilling template or manufacturing tolerances are given.
5. ABS enclosure; Tan and OD Green. Geometry is representative. Do not scale.
